

# FXFLARE PRODUCT RELEASE

**FXFlare** is a programmable bicycle safety system and a fun way to make sure that your bicycle is visible in low light or night time conditions!

**Call or  
Email  
NOW!**

The FxFlare Safety System is a unique, fun way to make sure that your bicycle is visible in low light or night time conditions. FxFlare lights up your wheels with the Seven selectable Text Messages that can be seen floating inside your wheels as you ride. With the FxFlare system you'll definitely been seen, and your message will be too!

## **FxFlare wheel lights - Features:**

- Programme FxFlare from you PC. (Serial data cable included)
- Windows XP / 2000 compatible.
- Software download free from <http://www.FxFlare.com>
- High-intensity LEDs give enhanced visibility up to one mile.
- Micro-processor controlled for ease of functionality.
- Stores seven different 'alpha-numeric' messages.
- Displays up to 16 characters per message.
- Different messages can be selected as required with push button control.
- Magically holds your message static regardless of wheel speed.
- Long life lithium cells (supplied) give up to 50 hours continuous use.
- Full image display at speeds for 9Km or faster.
- Motion activated - Auto on/off.
- Light weight durable construction.
- Waterproof to IP64.

*Important note before purchase:*

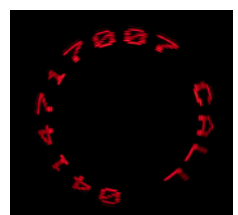

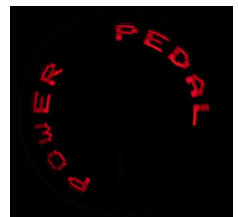

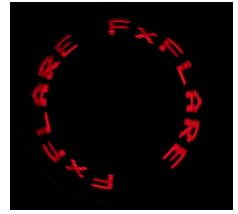

- *Current design fits 26 inch diameter wheels best with a 36 spoke construction.*

**BMX version ARRIVING SOON...**

Suggested Retail - \$ 79.95
